

BIBLIOGRAPHY OF WEST INDIAN MOSSES

William R. Buck

Buck, William R. (New York Botanical Garden, Bronx, New York 10458-5126, U.S.A.) Bibliography of West Indian mosses. *Moscoso* 5: 324-339. 1989. A bibliography of references on West Indian mosses has been compiled. 287 citations are presented.

Una bibliografía sobre los muscos (Bryophyta) de las Antillas Occidentales con 287 títulos. Es publicada antes de la flora briofítica ya en preparación por el autor y William C. Steere.

Mosses have been documented from the West Indies from as early as the late 17th century. However, most work on the group has only been floristic listings or the inclusion of West Indian species in more wide-ranging monographs. Many species have not been analyzed since their original description. Indeed, the vast majority of the following references are either descriptions of new species, floristic lists or monographs that happen to cover a few West Indian species. For this reason, a monographic flora of the West Indian mosses was proposed and is underway. All species that have been described from the West Indies, as well as many from the northern Andes—the area with the closest affinities to the Antillean moss flora—are being critically studied, described and illustrated. As a preparation to the initiation of this flora, the following bibliography was compiled so that literature records could be checked. Because of increases interest in the West Indies it seemed appropriate to share the following bibliography.

Bibliography

- Allen, B. H., M. R. Crosby & R. E. Magill. 1985 [1986]. A review of the genus *Stenodictyon* (Musci). *Lindbergia* 11: 149–156.
